La Manga

MURCIA

 Murcia » **La Manga (South)**

La Manga South Course was originally designed by Robert D. Putman in 1971 and subsequently remodelled by Arnold Palmer in 1992. At 6,449 meters off the white tees, the South is a top calibre championship course.

The front nine are particularly tough, with two par 3's over 200 metres and some daunting par 4s which will demand accurate driving between lakes and bunkers, requiring long irons or fairway woods to the green. The back nine, although shorter, has a number of intriguing dog-leg holes. Located in the centre of the valley, it has wide, palm-fringed fairways and water hazards on 15 out of its 18 holes. La Manga Club is a sports and leisure resort, which is home to three of Europe's finest golf courses. It has been nominated as one of the five top sports resorts in the world.

La Manga (North)

Murcia » La Manga (North)

La Manga North Course is an 18 hole, par 71 course that was designed by Robert Putman. Its undulating contours, including storm gullies, palm trees, lakes and 'barrancas' all create a unique element to the challenge on offer. Although this course is slightly shorter than the South course (5753 metres), its tight fairways demand precision rather than length. The large greens are all constructed to USGA standards, and provide a great test of putting. Danger on this course comes in the form of water hazards and 'barrancas' that snake their way through the course.

“ A brilliant third is needed if a birdie is to be secured as the green has been designed in the shape of a volcano. ”

Murcia » La Manga (West)

La Manga West Course is a Dave Thomas designed course where golfers will feel that every facet of their game is being put to the test on each shot. Set amongst pine woodlands, the West Course's design provides a distinctive character along the undulating land. The changes in elevation often deceive golfers in their choice of club. The tight front nine demands accurate driving to avoid the gullies while the back nine, up amongst the hills, is more open but nonetheless challenging. The unique surroundings with amazing views makes this a very popular choice for golfers.

“ A brilliant third is needed if a birdie is to be secured as the green has been designed in the shape of a volcano. ”
